

DESCRIPTION

Emalon® C is a blend of synergistic components of antioxidants, chelating compounds, surfactants and dispersing agents for highly effective antioxidation properties in animal feeds.

FEATURES

- A synergistic antioxidant compound for sequential blockade of oxidative phases
- Includes surfactant and dispersing agent

BENEFITS

- Offers superior and wide spectrum of antioxidant activity
- Protects fats, vitamins and pigments in feed or premix from oxidation
- Helps to preserve nutritive value of feed or premix
- Mixes and disperses uniformly in feed or premix
- Stable at pelleting temperatures
- Retains palatability of feed or premix
- Improves animal production and performance

COMPOSITION

Emalon® C is composed of ethoxyquin, BHT, citric acid, phosphoric acid, mono and diglycerides of fatty acids, surfactants and free-flow agents.

INCLUSION LEVELS

Emalon® C is recommended at the rate of 60 - 75 g (2.1 - 2.6 oz)/MT of feed. The inclusion levels are dependent on the levels of fat, quantity of unsaturated fatty acids in the fat, moisture and storage period of feed.

Please consult your Nutritionist, Bentoli® Representative or email us at info@bentoli.com for further assistance.

APPLICATION

Emalon® C is recommended to be added directly into the mixer. For best results, ensure accurate addition and thorough mixing of the product.

SHELF LIFE

Emalon® C is stable for 24 months from the date of manufacture.

STORAGE

Emalon® C should be stored in a cool, dry place and away from sunlight. Keep the container closed when not in use.

PRESENTATION

Emalon® C is available in 25 kg (55 lb) high quality WPP with HDPE lined bags.

COMPATIBILITY

Emalon® C is compatible for use with all commonly used ingredients in feed and premixes.

AUTHORIZATION

The ingredients of Emalon® C are in the list of approved ingredients for sale and use in animal feeds by AAFCO (Association of American Feed Control Officials).
