

ZAMBACMD100

100g/kg bacitracin methylene disalicylate

ACTIVE CONSTITUENT

100g/kg bacitracin methylene disalicylate

ADVANTAGES

ZAMBAC MD100 is a highly effective feed additive for the prevention and control of *Brachyspira hyodysenteriae* in pigs and *Clostridium perfringens* in pigs and poultry—for the maintenance of a healthy gastrointestinal tract (GIT). This leads to improved feed conversion efficiency and increased growth rate.

ZAMBAC MD100 has synergistic benefits when used in conjunction with a well-balanced anticoccidial program. ZAMBAC MD100 is a granular product, with minimal dust, excellent flowability and mixing properties.

MODE OF ACTION

ZAMBAC MD100 interferes with the dephosphorylation of C₅₅-isoprenyl pyrophosphate causing the inhibition of the cell wall synthesis of sensitive bacteria. It is active within the gastrointestinal tract where it modifies the intestinal flora and maintains the integrity of the gut.

INDICATIONS

For the control of Swine Dysentery caused by *Brachyspira hyodysenteriae*.

To control Clostridial Enteritis in suckling pigs caused by *C. perfringens*, add to the sow feed from 14 days before through 21 days after farrowing.

For the prevention and treatment of Necrotic Enteritis in broilers and layers caused by *C. perfringens* (Types A and C).

USAGE

Veterinary Prescription Required. For Animal Use Only.

Pigs Swine Dysentery Control: 2.0-3.0kg/tonne of finished feed for 5-7 days.

Sows Clostridial Enteritis Control: 2.5 kg/tonne of finished feed.

Poultry Prevention: 0.75-1.5kg/tonne of finished feed for 3-5 days.
Treatment: 1.5-2.5kg/tonne of finished feed for 5-7 days.

PACKAGING

25kg bags. Foil lined polyethylene bag to ensure product stability in humid climates.

PRECAUTIONS

Withdrawal Period for Meat & Eggs: Three (3) days.

Shelf Life of 36 months from date of manufacture. Expiration Date and Batch Number are indicated on packaging.
