

ZAMBACZN150

150g/kg bacitracin zinc

ACTIVE CONSTITUENT

150g/kg bacitracin zinc

ADVANTAGES

ZAMBAC ZN150 has been shown to combat *Clostridium perfringens*, to reduce lesions caused by this pathogen in poultry and pigs and to increase heat stress resistance in layers. This leads to improved survival, growth rate and feed efficiency in broilers and improved egg production and egg quality in layers. ZAMBAC ZN150 is a granular product, with minimal dust, excellent flowability and mixing properties.

MODE OF ACTION

ZAMBAC ZN150 interferes with the dephosphorylation of C₅₅-isoprenyl pyrophosphate causing the inhibition of the cell wall synthesis of sensitive bacteria. It is active within the gastrointestinal tract where it modifies the intestinal flora and maintains the integrity of the gut.

INDICATIONS

For the prevention and treatment of Necrotic Enteritis in broilers and layers caused by *C. perfringens* (Types A and C).

For the alleviation of the effects of heat stress in broilers and layers.

For the control of Swine Dysentery caused by *Brachyspira hyodysenteriae*.

To control Clostridial Enteritis in suckling pigs caused by *C. perfringens*, add to the sow feed from 14 days before through 21 days after farrowing.

USAGE

Veterinary Prescription Required. For Animal Use Only.

Poultry Prevention: 0.5-1.0kg/tonne of finished feed for 3-5 days.
Treatment: 1.0-1.67kg/tonne of finished feed for 5-7 days.
Heat Stress: 0.67kg/tonne of finished feed.

Pigs Swine Dysentery Control: 1.33-2.0kg/tonne of finished feed for 5-7 days.

Sows Clostridial Enteritis Control: 1.67 kg/tonne of finished feed.

PACKAGING

25kg bags. Multilayered polyethylene bag to ensure product stability in humid climates.

Store in a cool dry place with adequate ventilation.

PRECAUTIONS

Withdrawal Period for Meat & Eggs: Three (3) days.

Shelf Life of 36 months from date of manufacture. Expiration Date and Batch Number are indicated on packaging.
